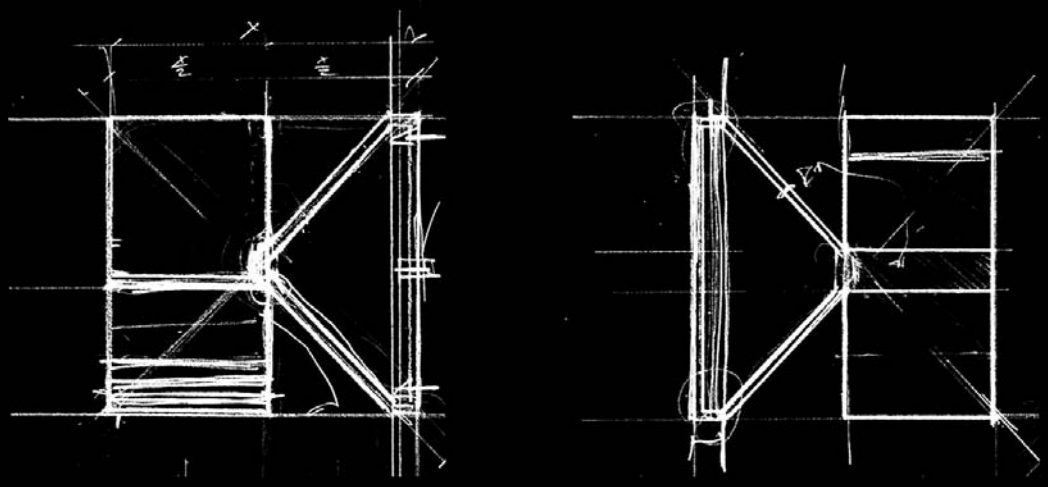
iGuzzini



iLyra

iLyra comes from iGuzzini's collaboration with the lighting designer Maurici Ginés of Artec Design and architects Iñaki Alday and Margarita Jover of Alday Jover. It was designed for the metropolitan park of the Zaragoza Expo 2008 international exhibition. The need was for a versatile lighting system which was able to meet different lighting requirements due to the park layout. The design has a simple geometry, with a cylindrical shape characterised by the support bracket.
The V-shaped bracket next to the cylinder allows for installation on a specific column, giving the right proportions to the module and offering a product with a unique look.

iGuzzini has always been committed to manufacturing tools able to meet any lighting requirement. That is why the Company is willing to cooperate - on request - with designers and architects in order to provide our clients with highly customised products and to ensure the best possible visual experience.

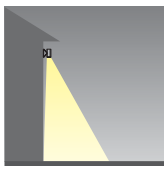
No upward emission of light flow

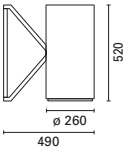


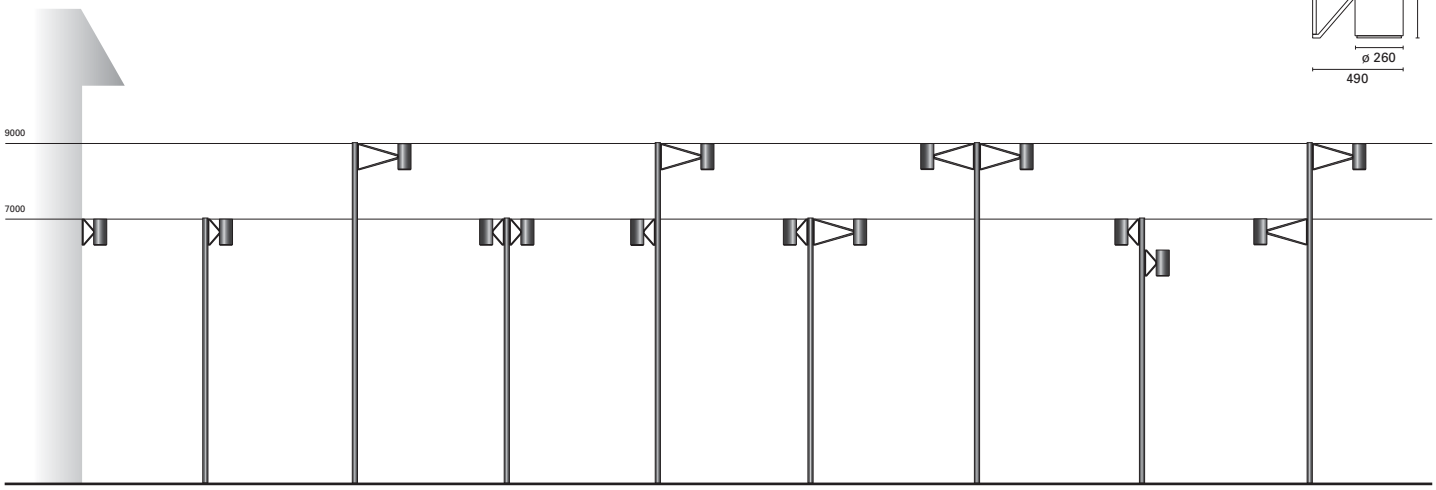
Safety cable

Extractable component-holder plate

- Luminaire for wall/column installation with downlight luminous emission.
- Optical assembly and frame made of aluminium alloy; arm made of hot galvanised welded iron tubes. Hardened sodium-calcium transparent colourless glass with thickness 4mm.
- RAL9006 grey finish.
- Internal silicone watertight gaskets.
- Steel retention cables between lower frame and optical assembly and between optical assembly and upper base.
- Superpure aluminium reflectors.
- Connection between terminal board and control gear with cables with fast-coupling terminals.
- Electronic control gear on extractable plate.
- All external screws are made of stainless steel.
- The technical characteristics of the luminaires comply with EN60598-1 and following amendments
- IP65 IK07
- F seal
- Insulation class I

code	lamp	optic	colour
Luminaire with electronic control gear, short arm			
FQ67	70 W G12 HIT	ST	15
FQ66	150 W G12 HIT	ST	15





Long arm, surface-mounted and catenary versions on demand.
Columns with groove for luminaires on demand.
